

Score sheet Doctoral School Biomolecules – Hearing

The student has prepared a presentation for the hearing. In the presentation the student shall give a short summary (background) of a selected topic, present clearly the scientific question, hypothesis and specific aims, elaborate the experimental part, present and discuss the results, draw conclusions of the work and give a brief outlook of a possible future impact of the study.

The scoring shall be done in the range of 1 (lowest) to 5 (highest) points using the score sheet. We are looking for students who reach a score of >29 points to be integrated into the DSPB program. Please indicate your judgment by checking the corresponding numbers for each point.

Name of Student

Name of Evaluator

Date

Presentation

	Low				High
Background, theoretical knowledge	1	2	3	4	5
Hypothesis	1	2	3	4	5
Specific Aims	1	2	3	4	5
Experimental Design (logic and appropriate arrangement of experiments)	1	2	3	4	5
Presentation of Results (clarity of data presentation, statistical evaluation)	1	2	3	4	5
Conclusion and Outlook	1	2	3	4	5
Answer to questions	1	2	3	4	5
Presentation style and time management	1	2	3	4	5

Scoring (Max. 40 points)
